

2019 Creative Youth Expo

- ❖ It was a fun workshop for all of making the Hypertufa container to use as a planter for a succulent plant. We had two sessions with 21 kids registered.
- ❖ Instructions were given to each person so they could make additional planters on their own at home.
- ❖ The organizers did a super job of setting up times, registrations, advertising, lunch, and everything that goes with putting on an Expo for youth.
- ❖ We just showed up with our supplies and we were set to go with two young boys helping unload and setting up tables. It was a joy working with this group of organizers and want to thank them for inviting our group to participate!
- ❖ They asked us to come back in 2020, but you know how that turned out – so now hopefully planning on 2021 for a creative gardening idea for the kids.
